Abstract

This deliverable reports the progress of the WP8 activities for communication, dissemination, standardization, exploitation and collaboration with 5G-PPP, which are envisaged by the SESAME Consortium. This document provides detailed information regarding the activities and initiatives carried on during the first year of the project. Considering the time scale of the project and the availability of tangible results, this document provides valuable contents to refine and update the identified strategies, following the evolution of SESAME, in addition reflecting the feedback received from the relevant stakeholders.
