Version:	1.0
Total Number of Pages:	99
File:	SESAME_Deliverable 8.5_v1.0_Final - Abstract

## **Abstract**

This deliverable outlines the SESAME communication, dissemination, standardization and 5G-PPP activities during whole duration of this EU-funded 5G-PPP project.

These actions are aligned with the planned processes for providing information about the SESAME project in general, as well as about its specific results and/or outcomes.

This document has also discussed the activities of SESAME with respect to other H2020 5G-PPP projects, including those that are more “closely relevant to SESAME. In addition, we have discussed several among the actions and/or other initiatives of the SESAME Consortium to participate to the already established 5G-PPP Working Groups.

This report updates the previously submitted Deliverable D8.3 that has covered the first year of the SESAME activities.
